Spring 2019

## Why You Need to Reboot or Upgrade Your Router

If you own a Wi-Fi router, you may have had to reboot it by simply unplugging the electrical cord from the device, wait a minute, and plug back in. In most cases, rebooting your router seems to fix a wide-variety of technical issues.

Why? Routers are like small computers, they use memory, a processor, and an operating system, and that means they too benefit from a fresh start every now and then. However, if you continually need to reboot your router, it may be time to replace it.

With homes adding things like Smart TVs, streaming devices, and Wi-Fi enabled security cameras, they may have reached the limits of their old-school router. With the number of connected devices per household continually increasing, it has never been more important to have the right router for your home.

The latest models support the 802.11ac standard, which may effectively handle 20 or more devices. By contrast the 802.11g standard-introduced in 2003 was designed to handle two or three. With increasing broadband speeds being offered, 100 Mbps and above, an outdated router may be preventing you from receiving the full speed of your internet plan.

## Instant Pot Silk Tie Easter Eggs

### Ingredients/Supplies Needed

- 6 large eggs
- ½ cup of vinegar
- 100% silk ties, the more colorful the pattern the better your eggs will look
- Old thin white or light grey t-shirt that you don't mind destroying
- Rubber bands or twist ties

### Directions

1. Carefully cut the stitching out of your ties and cut into pieces large enough to completely cover each egg.
2. Wrap your eggs with the full color patterned side of the tie or the front of your tie touching the egg.
3. Wrap tight but be gentle, you don't want to break the eggs.
4. Secure with rubber band or twist tie
5. Place the old cloth over the tie to protect the colors from bleeding onto your eggs.
6. Secure with rubber band or twist tie
7. Put all pre-wrapped eggs right in your instant pot.
8. Cover eggs with water
9. Add ½ cup of vinegar
10. Lock lid
11. Use manual high pressure for 5 minutes
12. When it beeps, let your pot natural release for 5 minutes
13. QR the remaining pressure until all pressure is released
14. While waiting on remaining pressure make an ice bath
15. Remove lid once all pressure has been released, and immediately submerge eggs in an ice bath for 5 minutes
16. Carefully unwrap eggs and let dry, making sure they do not touch while drying.

**A big THANK YOU to our local community for participating in Santa for Seniors.**

Your amazing generosity helped make Christmas so much brighter for many local seniors!

## DID YOU KNOW?

**Fiber is expensive to fix and we have a lot of it in the ground!**
