

Streaming Care Program

As you know, Cascade is breaking free from cable TV—and so can you. By cutting the cord you can still watch the shows you do now. Actually, by replacing cable you can pick your favorite content and could lower your current monthly bill.

In alignment with the change in service offering, we are rolling out a program to educate customers about streaming TV. So, for any customer ready to cut the cord, now is the time.

We realize for some people streaming may be new to you and you may not know how it actually works. We are here to help!

Beginning in June we will be offering a Streaming Care Program to help those who want to make the switch from traditional TV services to streaming video services such as YouTube Tv, HULU, and more.

We invite you to join us for weekly streaming demonstrations at our office. It's your opportunity to ask any questions and/or concerns you may have while providing you with simple step-by-step guidance. Let us show you how easy it can be to switch to streaming.

Starting on Tuesday, June 6th, and every Tuesday thereafter through 2023, we will have training sessions beginning at 2 p.m. Streaming demonstrations are by appointment only, so please call our office or email us to reserve your spot on our calendar.
